COMPLIMENT TO JUDGE REED.

Judge Reed's speech to the Knights of Pythias at Wichita on Monday evening adds new laurels to his reputation as an orator. It is doubtful if there is a more eloquent man in Kansas. His speech enting the name of Col. J. R. Hallowell to the Dodge City convention, which was published in full in these columns, will be remembered by many of our readers. If it should be the Judge's fate to be pitted against Jerry Simpson next year, the contrast in the personnel of the candidates would be even greater than it was in the last campaign.

IS LYING NECESSARY

An Experience in Truth Telling That Wasn't a Gaudy Success. A great many persons pretend to sadly deplore the fact that society is ever telling a great many little white lies. Frankness is strongly recommended and people are praised for saying just what they

Frankness appears very admirable in

theory, but it is quite another thing in

practice. A certain amount of deception

seems really necessary for the welfare of society, and the man or woman who tries to get on wholly without it is likely to have few friends and many enemies. It is said that the minister of a certain Chicago church became disgusted with the untruthfulness of mankind and preached a vigorous sermon in denunciation of society falsehoods. He declared that hes told out of politeness were just as wicked as those told with deliberate intention of deceiving. In fact, these

Writing on Metals. To write inscriptions on metals, says the Manufacturers' Gazette, take four ounces of nitric acid and one ounce of muriatio acid, mix and shake well together, and it is ready for use. Then cover your metal surface to be engraved with beeswax or wax clear to the metal, then apply the mixed acids with a feather or a stick of wood, carefully filling each letter, let it remain from five to ten minutes, according to appearance desired, then throw on water, which stops the etching process, and the

inscription is completed.
